

## Destination over the clouds

lyrics by roli

music by goodron

„every morning you wake up I wanna see your smile  
and when you're down I don't want you to cry“

So many times I've been suffering of these words  
I wanna leave it behind 'cause it really, really hurts

Why did you leave my life  
I can't stand thinking of it now  
And all the time, night and day  
I need to look forward to anything, I need a hit

Destination over the clouds  
Angel listen to me now  
I wish you were here and nowhere else  
Angel please come down, down on earth

I don't know who cares about me  
I hope it's you 'cause where you are you are free

Why did you leave my life  
I can't stand thinking of it now  
And all the time, night and day  
I need to look forward to anything, I need a hit

Destination over the clouds  
Angel listen to me now  
I wish you were here and nowhere else  
Angel please come down, down on earth

I think of your voice, the smell of your skin and the taste of your lips  
The way you were walking down a road, I miss it all

Destination over the clouds  
Angel listen to me now  
I wish you were here and nowhere else  
Angel please come down, down on earth
